

The Expertise Advancing Network Communications

Northforge Innovations advances network communications with dedicated software development and consulting expertise. We contribute to solving today's critical network communications challenges in two Centers of Excellence: Network Infrastructure and Network Security.

Northforge provides the intellectual capital services that enable customers to bring innovative products to market for the evolving Network Communications sector. Northforge is led by a seasoned and engaged management team that has led significant growth in revenue, profit and employee base during the past 10+ years.

Our team of highly skilled software development experts focus on advancing the security, speed and intelligence of packet transmission – the core language of the Internet. We hire our own specialists with deep passion and expertise to form the intellectual capital we have built over the past decade.

Experience Counts

Northforge employs highly skilled network communications software experts providing profound expertise across network communications and data packet transmission. Our engineering, technical and project management talent are focused on the information packets that are core to today's digital communications network. Northforge has assembled a development team that's recruited from around the world. Our internationally established recruiting network has enabled us to hire the best and brightest engineers with dedicated packet transmission domain expertise and with an average of 10 years of experience. Their technical expertise extends beyond software development services to deliver innovative solutions for the most demanding network challenges.

Headquartered in North America

We're globally accessible. Our North American headquarters are located in the heart of Canada's Silicon Valley, and with offices in Ottawa, Ontario; Montreal, Quebec, and Israel enabling our customers to connect with the Northforge development team during their business day. It's easy to do business with Northforge because our locations, language, culture, and Intellectual Property (IP) protection, enable smooth project communications, management, and development quality.

Our Customers

Our customers enable connectivity through wireless transmission and cloud computing, the core of today's digital communication infrastructure. Trusted by 75+ CEOs of OEM network communications companies, Northforge develops innovative software and solutions to make our customers' products faster, more secure and more reliable, while reducing their time-to-market and lowering risk. We have built a strong foundation of business growth because our customers return for our dedicated engineering expertise and software consulting services.

NORTHFORGE AT-A-GLANCE

- Northforge develops specialized innovative software for the evolving Network Communications sector.
- Headquartered in North America, with a presence in Israel, we are globally accessible to all time zones.
- Two Centers of Excellence: Network Infrastructure and Network Security
- With an average of 10 years of experience, Northforge's developers bring deep networking DNA to each project
- Trusted by 75+ CEOs of OEM network communications companies
- Northforge is committed to developing the highest quality software as measured by innovation, high reliability, and unsurpassed performance standards.

Northforge's mission is to provide software development expertise in network infrastructure and network security that advances the security, speed and intelligence of packet transmission and processing.

Customers utilize Northforge to provide the essential ingredients for success by leveraging our deep and comprehensive talent and expertise. Our experience in solving diverse challenges enables us to succinctly define and document the requirements of our engagement with customers. Northforge's entrepreneurial approach enables us to be nimble and flexible in both our thinking and response time. We go the extra mile to ensure our customers are completely satisfied with their project outcomes and high quality network communication solutions and deliverables.

Centers of Excellence

Network Infrastructure

- Switching Silicon
- Routing
- SDN/NFV/VNFs
- Protocols
 - Data Plane
 - Control Plane
- Network Processors
- VoIP
- Signaling
- Element Management
- xPON
- White Box

Network Security

- IDS
- DDOS
- IPS
- Pattern Matching (DPI)
- Threat detection and mitigation
- User Behavior Analytics (UBA)

OUR SERVICES

- **Software Architecture and Design Consultation**
- **Software Development**
